HOW TO PUMP UP YOUR IMMUNE SYSTEM

Take MGN3® — the #1 serious immune enhancer. In clinical tests, MGN3 tripled the activity of NK cells — your immune system's first line of defense — and significantly increased B and T cell counts.

MGN3 will help your body maintain peak immune system activity for as long as you keep on taking it... never losing effectiveness or causing hypersensitivity.

Of all the medical breakthroughs that have been reported in recent years, none has generated more excitement than the relatively new field of immune enhancers.

Based on the tried-and-true principle that "a good defense is the best offense," these compounds work at the cellular level to boost the effectiveness of the body's own built-in defenses — the immune system.

One in particular stands out from the crowd

Many immune enhancers have been tested, but to at least one researcher, none can compare to MGN3.

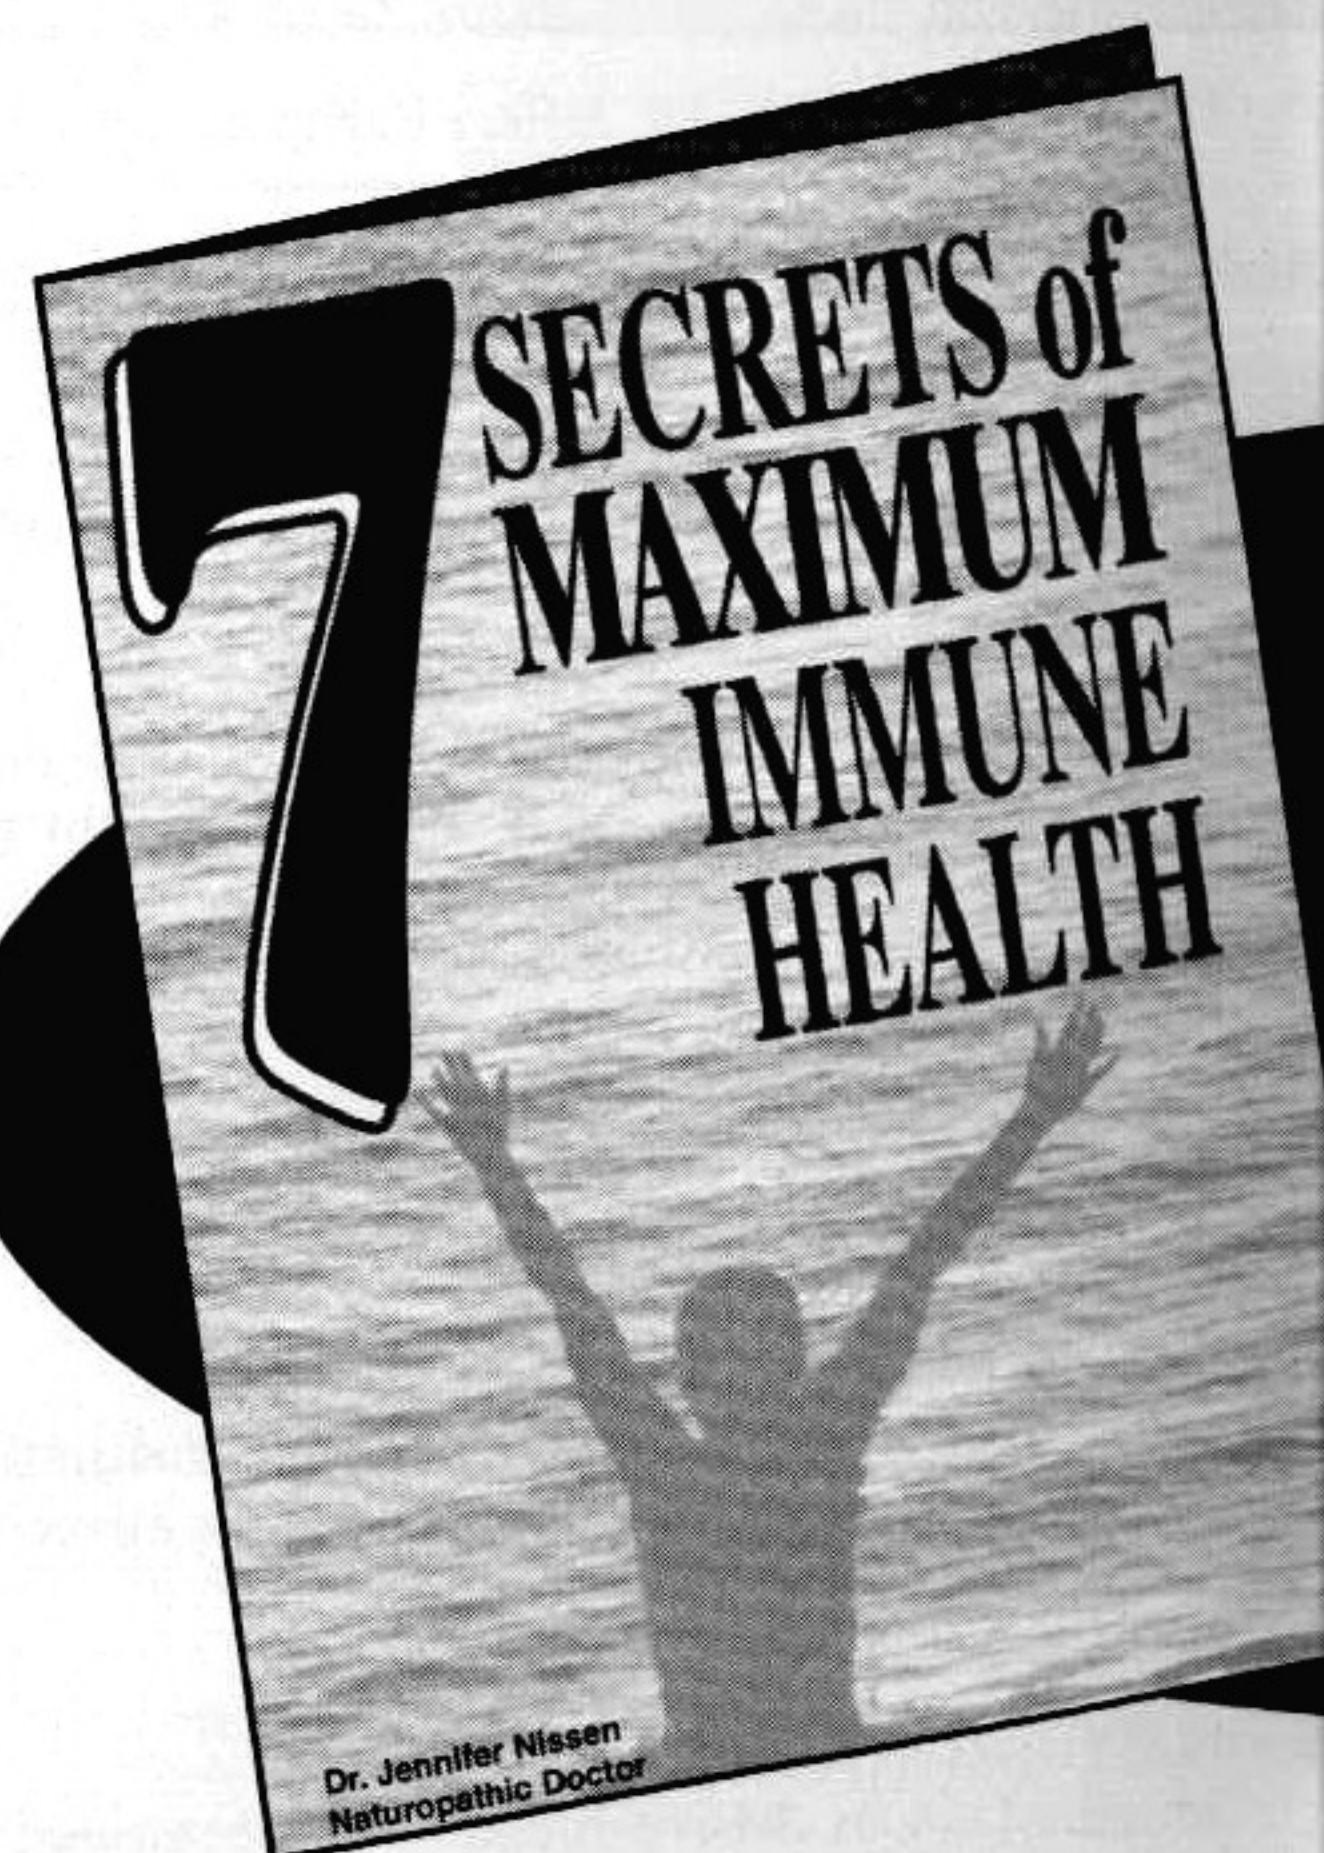

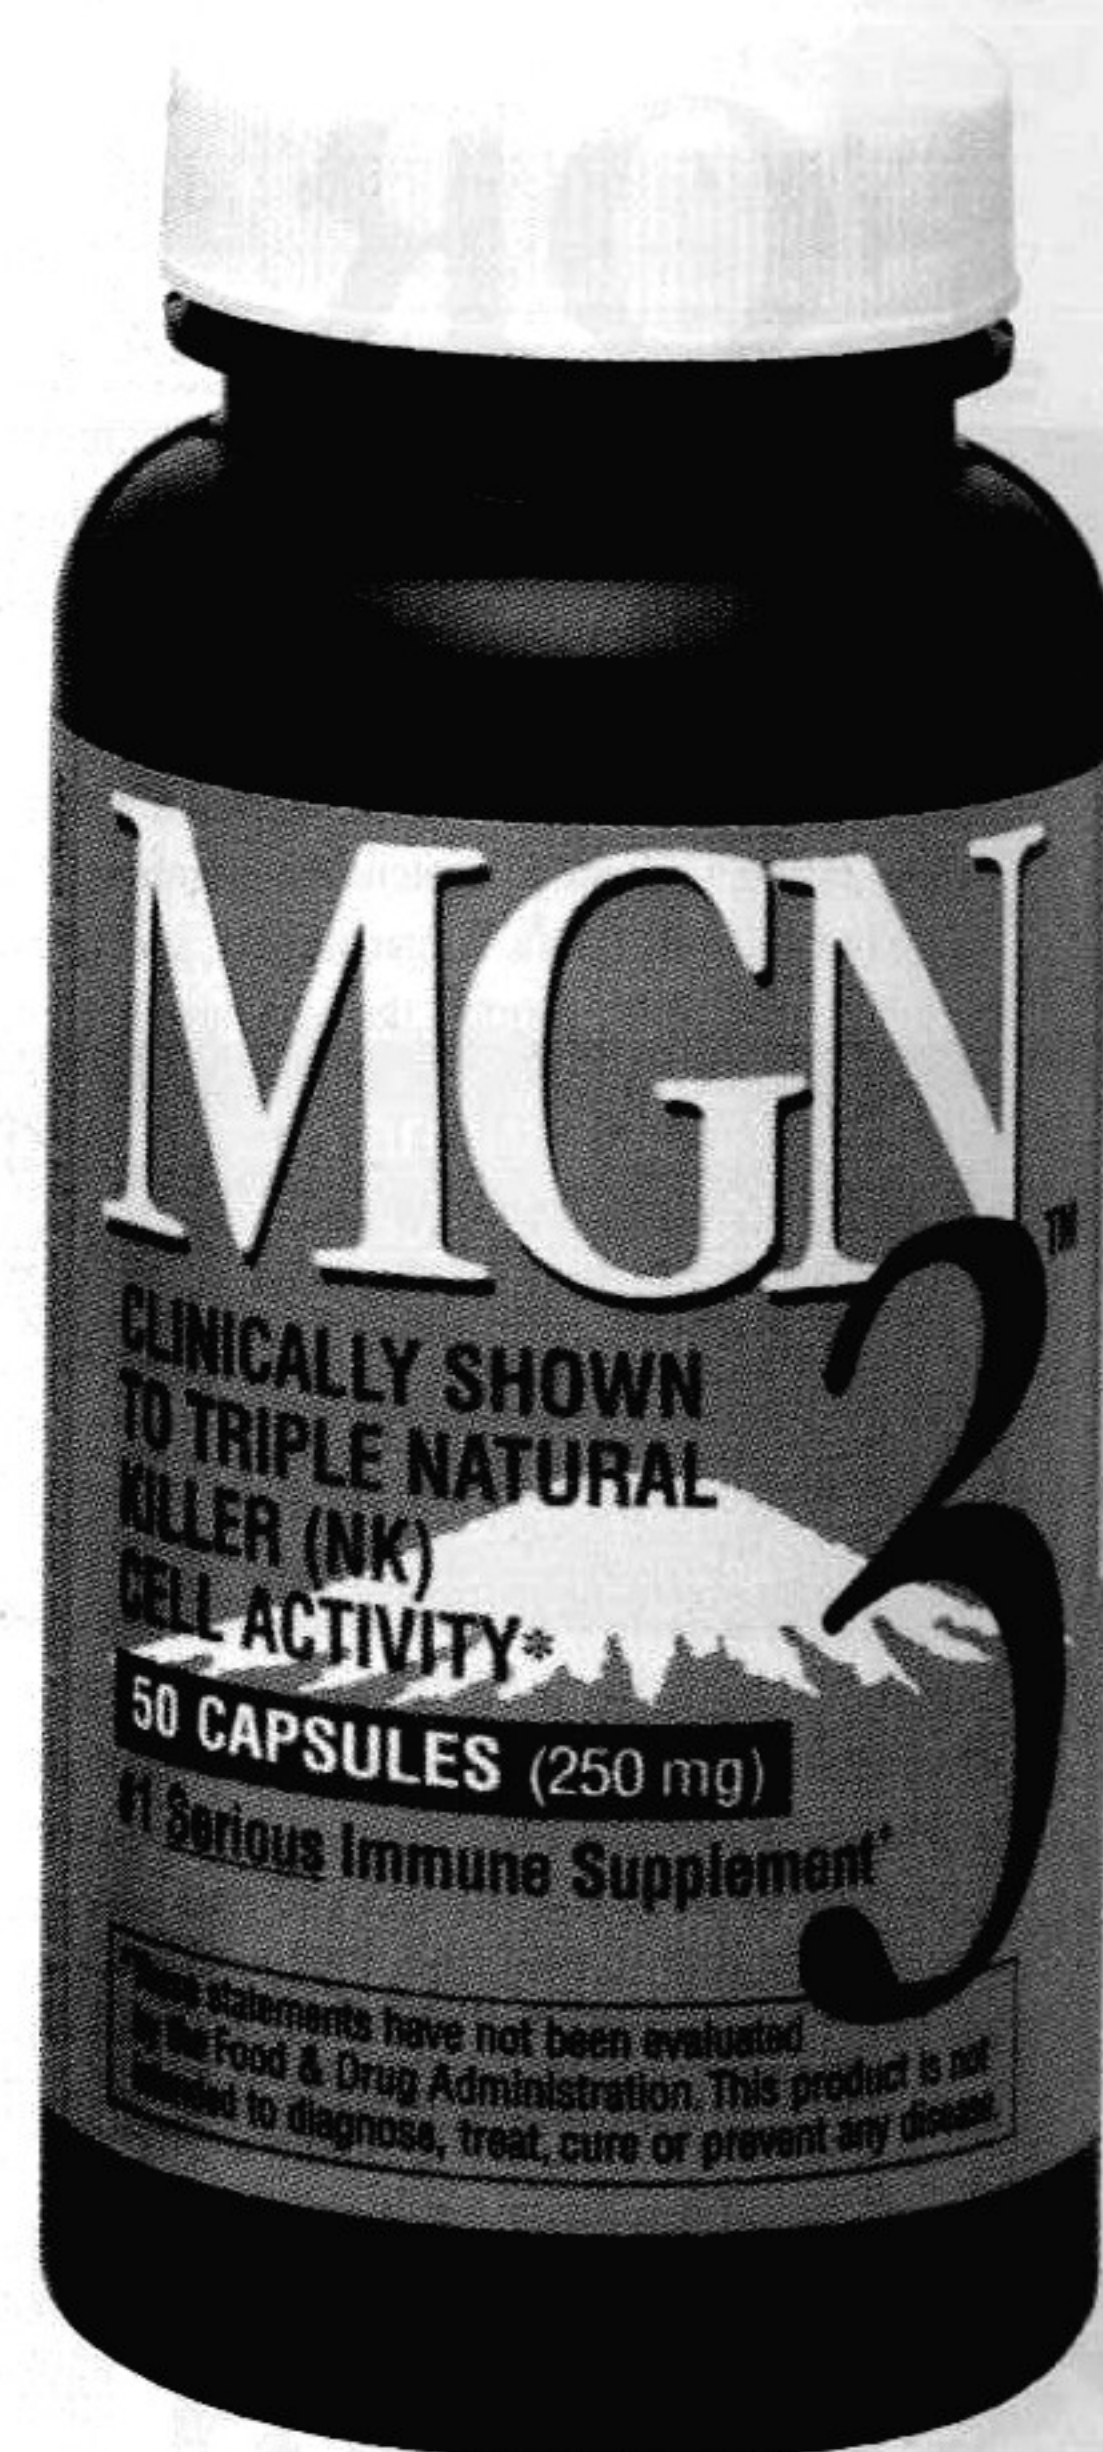

"MGN3 was so promising, so profoundly superior to everything else I had evaluated," says Mamdooh Ghoneum, PhD., Chief

of Research of the Department of Otolaryngology at Charles Drew University in Los Angeles, "that I abandoned all other projects, in order to focus entirely on this substance."

The immune system is an amazing machine

Circulating through the bloodstream, the 130-odd different types of white blood cells that make up the immune system identify, lock onto and destroy invading cells.

T and B cells produce antibodies and chemical messengers, or cytokines, that rally other immune cells to action. NK, or Natural Killer, cells are the "ground troops" — going where they're needed to neutralize the threat. In a healthy immune system, T and B cell counts are strong and NK cells are highly active.

© LaneLabs

and help your body FIGHT HARDER, FEEL STRONGER, and BE HEALTHIER than you ever thought possible.

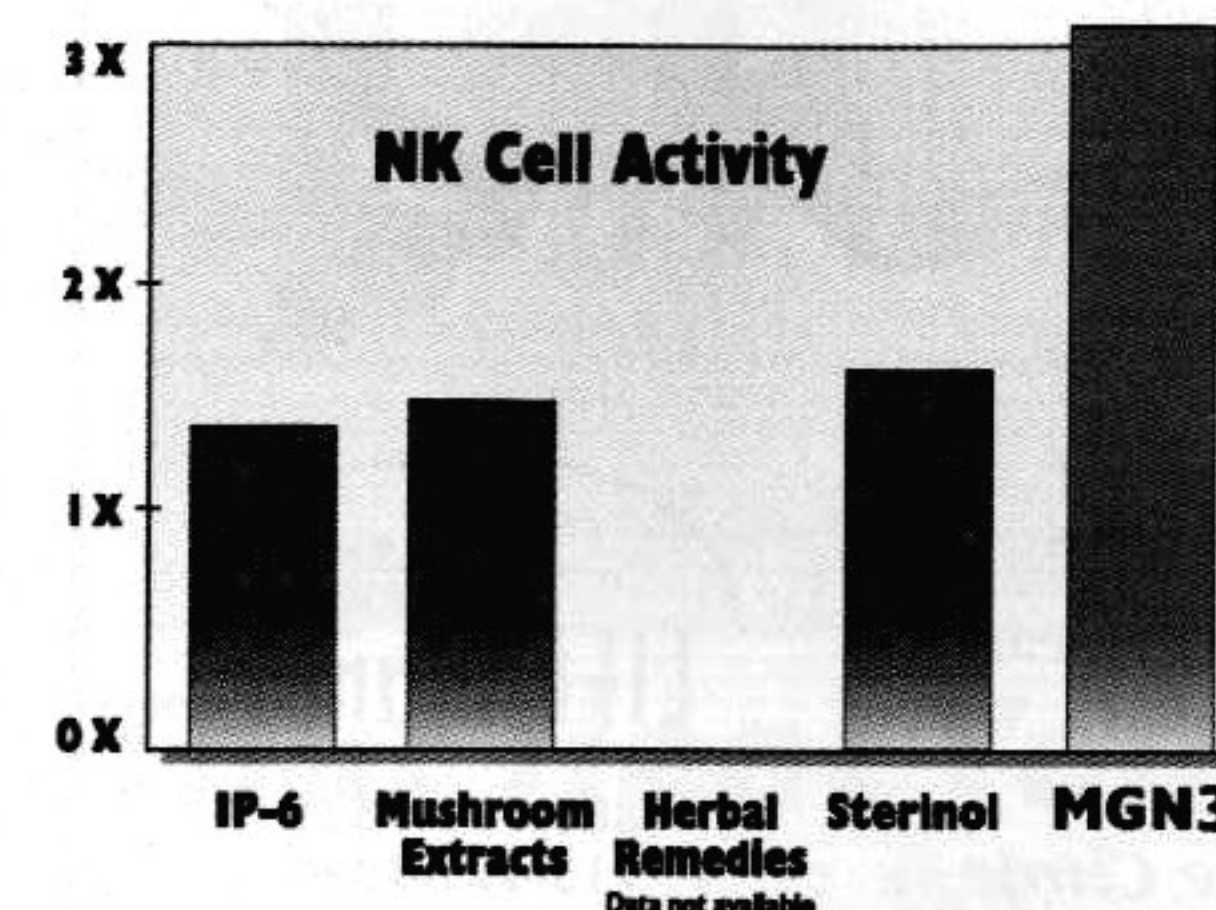

That is where MGN3 comes in

While most people have roughly the same number of NK cells, scientific research suggests that the activity level of those NK cells can vary tremendously. Within each NK cell are microscopic particles, or granules that, when injected into a bad cell, cause it to self-destruct. The more granules the NK cell contains, the more active it is considered to be.

MGN3 actually TRIPLES NK-cell activity

In studies conducted by Dr. Ghoneum, taking up to 3,000 milligrams of MGN3 daily increased the activity level of NK cells by as

MGN3 - Unmatched power in increasing NK cell activity

much as 300%... at the same time boosting T cell and B cell counts.

Unlike other immune enhancers that require you to "cycle on" and "cycle off" periodically, MGN3 will neither lose effectiveness over time nor overstimulate the immune system. That means you can keep on taking it indefinitely.

The Innovative Company

"Exciting!"
"A Godsend!"
"We Love It!"
That's what
actual users say...

"MGN3 is one of the most exciting immune supplements I have researched."

-Burton Goldberg, PhD. (Hon.),
"The Voice of Alternative Medicine"

"Last fall I began taking MGN3. At the end of December, I sent my blood to the laboratory and ... for the first time in 15 years, every one of my tests was within the normal range."

-Dr. Warren Levin, CT

"There is nothing else like it. I have been taking MGN3 for one month and I cannot believe the change."

-Vicki Woods, CA

"I don't ever remember feeling this well, not in my entire life!"

-Lora Tandy, KS

"MGN3 has been a Godsend..."
-The Wiegman Family, NY

"My doctor gave me the written literature on MGN3... I began MGN3 and it's made a HUGE difference in my life."
-Joy Andrews, NV

"When I started MGN3, I was delighted to find that it really made a difference. I have more energy! It is the most effective natural supplement I have come across without any negative effects."

Michael Bailey, OH
